What is ForeNova MDR?

ForeNova MDR is designed to help organizations enhance their security operations and better secure themselves from an ever-growing threat landscape. This service leverages the concept of human-machine intelligence, a combination of the latest security technology with human experience, perception and skepticism, to deliver accurate threat detection and analysis, as well as actionable response assistance to eliminate threats and prevent catastrophic security incidents from occurring.

➤ Value Proposition

1
Increase security operations efficiency by leveraging leading-edge security technology, proven security techniques and processes, and experienced security professionals

2
Keep organizations secure through real-time threat detection and analysis

➤ Benefits

- 24x7 security operations minus operational overheads and staffing complexities

- Reduce employee attrition caused by menial and repetitive tasks and avoid alert fatigue

- Improve organizational security through effective threat detection and response capabilities by leveraging human-machine intelligence

- Reduce internal IT security workload and free up resources for more business-relevant security activities

- Constantly improve and strengthen security posture with input from experienced security professionals

The Concept of Human-Machine Intelligence

Experienced Security Professionals

- Round-the-clock monitoring, detection and analysis
- Timely and relevant alerting
- Context-relevant advisory and guidance
- Actionable response assistance
- Optimized security operational processes and procedures
- Proven threat detection and investigation techniques

+

State-of-the-Art Detection Capabilities

- Cloud-based XDR platform
- Network + endpoint visibility
- AI-power detection capabilities
- User and entity behavior analytics
- Global threat intelligence
- Intuitive security platform built to deliver value

Service Elements

Service	Description
Threat analysis and identification	24x7 threat detection, analysis and verification, leveraging AI-enabled detection capabilities and experienced security professionals to accurately identify and analyze threats and provide notification in a timely manner.
Threat response and remediation	Context-relevant threat response assistance rendered remotely by our team of security experts to help customers manage and eradicate detected threats. Covers emergency containment assistance, detection and impact analysis, traceability investigations and hardening recommendations.
Asset Tracking	Initial and regular review of in-scope assets to track and identify unauthorized changes, as well as to provide proper context to the service.
Expert Services	Dedicated security professional assigned to every customer to ensure continuity in communications regarding threat notification, response assistance as well as any related advisory or recommendations included in the service. Also include quarterly proactive threat hunting exercises from our security professionals.
Customer Portal	Gain access to real-time security overview of the customer's monitored environment, including open and closed cases, security view of monitored assets as well as access to regular reports.

About ForeNova

At ForeNova, we aim to deliver advanced cyber security solutions everywhere by building innovative yet competitive solutions for small and mid-sized businesses.

ForeNova was born out of the painful frustrations of small and mid-sized organizations who could not afford nor manage their own cyber security operations and the challenges that come with it: such as alert fatigue, false positives, skills shortages and manual and inconsistent dashboards. We knew there had to be a better way.

ForeNova's experts take a fresh and aggressive approach to cyber security by listening to our customers and quickly transforming their demands into reality. For more information, please visit our website at **www.forenova.com**.
